

AUTOMATIC RABBIT HAND CUTTER MOD. TM-2517

Maximum production: 2,500 rabbits/hour

Outer parts in AISI-304 stainless steel.

0.5hp electrical motor, three-phase 230-400V, IP-65 protected.

The electric control pad and panel as well as the pneumatic panel are situated in a waterproof area.

Operates with compressed air at 6 kg/cm² of pressure.

It's air-tight and can be fully cleaned with a pressure hose (except electrical boxes).

All the mechanisms are lubricated for life: zero maintenance.

Minimum dimensions: 300 x 300 mm. No need to adjust the sacrifice chain.

Maximum safety: the machine will only operate if the chain is in operation and emits cutting signals.

The entire machine is compliant with EC quality, safety and hygiene regulations.

Machine weight: **140 kg**

Machine + packaging weight: **228 kg**

Packaging dimensions (cm): **170 x 85 x 70**
